BALANCING CONTROL WITH ACCESSIBILITY

PRESS RELEASE

FOR IMMEDIATE RELEASE

New England I.T. Companies Join Forces in Recession

Five-company collaboration to leverage industry talent, grow opportunity, host business continuity event.

Warwick, R.I. – Oct. 28, 2009 – Five New England IT integrators, including **Atrion Networking Corporation**, **PC Troubleshooters, Inc.**, **Code Red Business Continuity Services, LLC**, **EchoStor Technologies** and **Integrated Security, Inc. (ISI)**, today announced they have formed a consortium partnership. The consortium will leverage cross-industry talent and technologies to grow profitable opportunities and provide its clients with more comprehensive IT solution offerings.

The group also plans to host regular technology education forums, the first of which will be the *Business Continuity and Growth Forum* on Nov. 19th from 11:00 am – 6:00 pm at Gillette Stadium in Foxboro. Featuring a tradeshow session, strategic planning presentation, roundtable discussions and breakout workshops, the forum will offer C-level executives insight into the future of technology, particularly in the areas of business continuity and growth, security and compliance and emerging technologies.

“PC Troubleshooters has always been active across the industry community, but now in the midst of recession, collaboration is critical,” said Eric M. Shorr, president, PC Troubleshooters. *“Often small and mid-size businesses do not have the resources or bandwidth of a large corporation, but working together in the Consortium, we are able to provide our clients with a diverse array of solutions and at competitive prices. We are proud to be working with some of New England’s finest IT service and solutions providers.”*

“The Business Continuity and Growth Forum is a valuable example of the collaboration our companies embody,” said Paul Cronin, Senior Vice President of Atrion. *“The event will be an educational forum for IT executives to learn how advancements in technology have more than ever before provided the opportunity to simultaneously safeguard business, increase productivity and reduce cost. Attendees will also learn how to capitalize on these important advancements and begin planning for future success.”*

“In today’s fast paced world of technology, companies are often taking on significant risk for both themselves and their clients by diversifying outside of their core competency,” said Michael Ehrlich, President and CEO of Integrated Security, Inc. *“At Integrated Security, we can strategically offer more complete services through this Consortium, leveraging the expertise of our partners while remaining focused on being New England’s premier security integration firm.”*
