PC TROUBLESHOOTERS, INC. LAUNCHES MANAGED SECURITY SERVICES THROUGH PARTNERSHIP WITH MX LOGIC

Managed Email and Web Security Services Provide Customers with First Line of Defense to Prevent Threats from Entering Managed Networks

Warwick, RI — July 22, 2009 — PC Troubleshooters, Inc., a leading provider of I.T. network and security solutions, today announced that it has finalized a partnership with MX Logic® - a leading managed security services provider. This partnership will allow PC Troubleshooters to provide managed email, web security and message archiving services to its customer base.

PC Troubleshooters is adding MX Logic Email Defense Service and MX Logic Web Defense Service. These new hosted offerings provide customers with an effective first line of defense at the network perimeter to prevent vulnerabilities and threats such as spam, worms and spyware from entering a managed network. In addition, PC Troubleshooters will be offering:

- **MX Logic Message Archiving** to allow businesses to store, monitor and retrieve all inbound, outbound and internal emails for compliance or general storage/retrieval purposes.
- **MX Logic Message Continuity** to allow customers to continue using email during planned or unplanned outages through a Web-based email client. The service provides 60 rolling days of storage to protect against prolonged outages.
- **MX Logic Fail Safe Service** that provides five days of rolling email storage to protect against the loss of emails during planned or unplanned outages.

"MX Logic's managed security services fit well with our current offerings and our business philosophy – provide solutions that enhance customer productivity and profitability," said Eric M. Shorr, President of PC Troubleshooters. "MX Logic is an ideal business partner for us. Their simple, smart managed security services are highly effective and affordable – a perfect fit for our customer base which ranges from Small-to-Medium Sized Businesses and Enterprises."

The implementation of MX Logic products will assure a better IT experience for PC Troubleshooters' customers. By thwarting spammers and spoofers, utilizing web defense to restrict surfing, and generating internet usage reports, MX Logic products keep bandwidth available for data applications.
