PC Troubleshooters, Inc. Soars to “Silver Status” in Surveillance Sales

Warwick, RI, May 19, 2008 – PC Troubleshooters, Inc. is pleased to announce that in just five months after introducing their product-line, they have been elevated to a SOLUTION SILVER PARTNER within the Axis Communications Partner Program. Achieving this status demonstrates how PC Troubleshooters is listening to the current security requirements of its client base and providing top quality IP surveillance products to fulfill those needs.

IP Surveillance, also known as *Network Video*, is a system that enables the user to monitor and record “live” video over an IP Network (LAN/WAN/Internet). Digital quality images can be viewed from *anywhere* at *any time* around the world with an internet connection.

With over 1 million IP Network Cameras sold to date, Axis is internationally known for their excellence and expertise in digital surveillance. The market trend shows a shift from traditional analog camera systems to the more concise higher quality image production of the IP Network Camera Solution.

“We are proud that Axis Communications has recognized our commitment to providing clients with high quality security solutions” said Eric M. Shorr, President of PC Troubleshooters. “In such a short time we have seen the addition of Axis’ Digital Surveillance Cameras flourish and become a strong addition to our already comprehensive security solution product mix.”

About PC Troubleshooters, Inc.

For 16 years, **PC Troubleshooters, Inc.** has been an industry leader providing small-to-medium sized businesses IT support services and maintenance of computer networks, servers, workstations and applications. PC Troubleshooters has recently enhanced its already comprehensive line of high quality security products by introducing a Digital Surveillance Program.
